15 PIECE SINGLE-CUT TAP SET, HSS, M3 - M12 RUKO 245004R0

GREAT VALUE!

- thread can be cut in one operation (i.e. with one tap) by hand or machine
- for through threads in unalloyed or low-alloyed steels, malleable cast iron and non-ferrous metals (not for stainless steel)
- includes:
 - single cut taps in sizes M3, M4, M5, M6, M8, M10, M12
 - 7 twist drills in HSS ground (bright) in corresponding sizes
 - 1 tap wrench size 1.1/2 (M1 - M12)
- supplied in lightweight polystyrene case

\$129.50

B&W International

FLIGHT TOOL CASE 'RHINO' WITH WHEELS, TELESCOPIC HANDLE AND 3 TOOL BOARDS

B&W 115.04/P

\$747.00

- case with the most tool boards in the B&W range
- 3 removable tool boards with 2 x 23 and 1 x 15 tool pockets respectively and document tray in lid
- suitable for checking-in with airlines

tools not included

- shell made of HDPE - no dents, cracks, bumps
- max loading 35 kg, net weight 8 kg
- user-adjustable floor partition
- telescopic handle, improved wheels and carry handle
- 2 key locks and 1 combination lock
- inside dimensions 510 x 390 x 195 mm

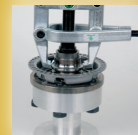

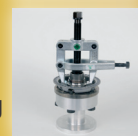

GREAT QUALITY!

UPDATED DESIGN!

2 ARM PULLER WITH SIDE CLAMP FOR INNER RACE BEARINGS KUKKO 204-V

- thanks to its side clamp and adapter which fits all relevant axle holes on VAG and other vehicles, this puller is particularly well suited for use on vehicles where the wheel bearing on the front axle falls apart during dismantling and only the inner ring remains on the axle
- particularly for use on vehicles with riveted ABS rotor (hub 10407613G) such as on the VW Golf
- max pulling width 90 mm / 3.17/16", max pulling depth 100 mm / 3.15/16"
- the adapter creates a flush overlay; using the side clamp, the sharp pulling hooks are pressed against the inner ring and manipulate the ring enough to enable easy and safe pulling
- puller hooks are specially hardened and smoothed
- side clamp increases the pressure of both hooks significantly
- milled thread treated with special coating, 22 mm hex head
- strong design, high performance and service life
- no cutting-off, chiseling or hammering required
- safe, fast and efficient disassembly
- flat inner races are disassembled without any problems
- all components available as spare parts
- tube of special KUKKO spindle grease included in delivery

\$372.00

NEW PRODUCT!

2 AND 3 ARM PULLER SET WITH 3 DIFFERENT PULLING HOOKS - UP TO 24 PULLER VARIATIONS, UP TO 120 MM WIDTH AND 350 MM DEPTH KUKKO K-2030-10+S+T

- great set at an outstanding price
- this set contains the basic equipment for 2 and 3 arm pullers needed in every workshop
- it also includes all 3 different type of pulling hooks available - standard, narrow and extremely narrow with chamfered corners
- for pulling off transmission gears, bearings, pinions and synchronizer bodies
- by turning the pulling hooks, the pullers can be used both externally and internally
- pulling width up to 120 mm, pulling depth up to 350 mm, thanks to included extensions
- 2 arm version for space saving work, 3 arm version for even load distribution and especially secure hold on the part to be pulled (refer to chart for max pulling force with each type of puller)
- design allows hooks staying parallel, even under a full load
- the part to be pulled lies only on the support surfaces of the pulling hooks and is pulled off gently
- the Quick Adjust red knob ensures fast, trouble-free adjustment - the pulling hooks can be loosened and moved along the crossbar without the need for a wrench
- the cross-bars have a hex profile, allowing use of a wrench for counterholding when needed
- the spindle heads have a band that prevents the wrench from slipping off during the pulling process
- thanks to the parts included in this comprehensive set, up to 24 different puller combinations are possible (refer to diagram below)
- supplied in KUKKO L-Box system box with foam
- all items also available individually for replacements

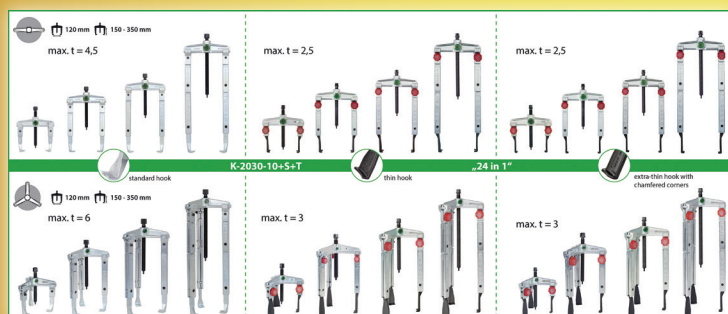

NEW SET!

MUST HAVE!

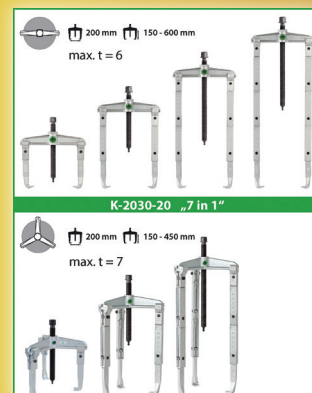

\$994.50

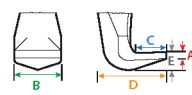

2 AND 3 ARM PULLER SET - UP TO 7 PULLER VARIATIONS, UP TO 200 MM WIDTH AND 450/600 MM DEPTH KUKKO K-2030-20

NEW SET!

- this set contains the basic equipment to assemble larger 2 and 3 arm pullers needed in every workshop, particularly for the use on commercial vehicles and heavy machinery
- for pulling off transmission gears, bearings, pinions and synchronizer bodies
- by turning the pulling hooks, the pullers can be used both externally and internally
- also suitable for asymmetrical work pieces
- can be used with hydraulic spindle 8-01 (optionally available)
- pulling width up to 200 mm, pulling depth up to 600 mm (2 arm) and 450 mm (3 arm)
- 2 arm version for space saving work, 3 arm version for even load distribution and especially secure hold on the part to be pulled
- max acceptable pulling force with manual spindle 6 tons (2-arms) / 7 tons (3-arms), with optional hydraulic spindle 7 tons (2 or 3 arms)
- design allows pulling hooks staying parallel, even under a full load
- the cross-bars have a hex profile, allowing use of a wrench for counterholding when needed
- the spindle heads have a band that prevents the wrench from slipping off during the pulling process
- thanks to the parts included in this comprehensive set, up to 7 different puller combinations are possible (refer to diagram)
- set also includes pressure pads that are used when the shaft is hollow and there is no support available for the pressure spindle
- supplied in KUKKO L-Box system box with foam
- set also available with thin hooks (KUKKO K-2030-20-S) at the same price
- all items also available individually for replacements
