ANTISLIP FASTENING SYSTEM

RINGSTOP FASTENING SYSTEM

The Open End of Sidchrome 467 Spanners feature the ANTISLIP design – a locking groove prevents slippage and knuckle injury.

The Ringstop Gothru System employs a patented ring within the geared ring end of the ratchet which prevents the spanner from slipping past the fastener. Extremely useful when working on long bolts, or in positions where it is inconvenient to use the other hand to keep the tool on the fastener. Unlike traditional stop features, the Ringstop can be pushed past the fastener head when necessary, for use with double nut, or bolt and nut configurations. The Ringstop can also be used with socket and bit adaptors, increasing the versatility of the tool.
